

## **Product Data Sheet**

## hsa-miR-1-3p miRNA Inhibitor

| Catalog #      | Source           | Reactivity              | Applications   |
|----------------|------------------|-------------------------|--|
| CIH0089        | Synthetic        | c H                     |  |
| Description    | Sy               | ynthetic miRNA inhibi   | ors are used to inhibit hsa-miR-1-3p by transfaction.      |
| Specificity    | m                | niRNA Inhibitors are ch | emically synthesized, complementary, antisense             |
|                | si               | ingle-stranded oligonu  | cleotides to their target, endogenous mature miRNA. It     |
|                | ef               | ffectively prevents the | target miRNA to bind to normal cellular binding sites.     |
|                | Tr               | ransfection of inhibito | rs followed by downstream gene expression analysis or      |
|                | pl               | henotypic analysis, is  | performed to elucidate the targets and roles of particular |
|                | m                | niRNAs.                 |  |
| Form           | Ly               | yophilized powder       |  |
| Gene Symbol    | hs               | sa-miR-1-3p             |  |
| Accession No.  | . M              | /IMAT0000416            |  |
| Components     | Tł               | his synthetic miRNA is  | based on the mature miRNA sequence. It does not contain    |
|                | th               | he full precursor miRN  | A stem-loop.   |
| Directions for | <b>Use</b> W     | Ve recommend re-susp    | pending the lyophilized synthetic miRNA using DNase and    |
|                | RI               | Nase-free ddH2O. To r   | nake a 100 uM stock, dissolve the lyophilized powder using |
|                | 10               | 00 ul of ddH2O.         |  |
| Storage/Stabi  | i <b>lity</b> Sł | hipped at 4 °C. Store a | t -20 °C for one year. Avoid freeze-thaw cycles after      |
|                | re               | econstitution.          |  |

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC-Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish
