## Recombinant Human GADD45B Protein

| Catalog #                 | Source                                                                                                                                                                            | Reactivity | Applications |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|--------------|
| CST1612                   | E. coli                                                                                                                                                                           | H          |              |
| <b>Description</b>        | Recombinant Human GADD45B Protein is produced by E. coli expression system and the target gene encoding Met1-Arg160 is expressed with C-terminus His tag.                         |            |              |
| <b>Form</b>               | Liquid in a 0.2 µm filtered solution of PBS, pH 7.4.                                                                                                                              |            |              |
| <b>Gene Symbol</b>        | GADD45B                                                                                                                                                                           |            |              |
| <b>Alternative Names</b>  | MYD118; Growth arrest and DNA damage-inducible protein GADD45 beta; Myeloid differentiation primary response protein MyD118; Negative growth regulatory protein MyD118            |            |              |
| <b>Entrez Gene</b>        | 4616                                                                                                                                                                              |            |              |
| <b>SwissProt</b>          | O75293                                                                                                                                                                            |            |              |
| <b>Purity</b>             |                                                                                                                                                                                   |            |              |
| <b>Chemical Structure</b> | MTLEELVACD NAAQKMQTVT AAVEELLVAA QRQDRLTVGV YESAKLMNVDPDSVVLCLLA<br>IDEEEDDIA LQIHFTLIQS FCCDNDINIV RVSGMQRLAQ LLGEPATQGTTEARDLHCL<br>LVTNPHTDAW KSHGLVEVAS YCEESRGNNQ WVPYISLQER |            |              |
| <b>Quality Control</b>    |                                                                                                                                                                                   |            |              |
| <b>Directions for Use</b> | Always centrifuge tubes before opening. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.                                                                 |            |              |
| <b>Storage/Stability</b>  | Store it at -20°C to -80°C for one year. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.                                  |            |              |

**Application key:** E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC- Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference

**Species reactivity key:** H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb- Rabbit, S- Sheep, Z- Zebrafish
