## Recombinant Human CCDC80 Protein

| Catalog #                 | Source                                                                                                                                                                                          | Reactivity | Applications |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|--------------|
| CST2175                   | E. coli                                                                                                                                                                                         | H          |              |
| <b>Description</b>        | Recombinant Human CCDC80 Protein is produced by E. coli expression system and the target gene encoding Ile261-Thr430 is expressed with C-terminus His tag.                                      |            |              |
| <b>Form</b>               | Liquid in a 0.2 µm filtered solution of PBS, pH 7.4.                                                                                                                                            |            |              |
| <b>Gene Symbol</b>        | CCDC80                                                                                                                                                                                          |            |              |
| <b>Alternative Names</b>  | DRO1; URB; Coiled-coil domain-containing protein 80; Down-regulated by oncogenes protein 1; Up-regulated in BRS-3 deficient mouse homolog                                                       |            |              |
| <b>Entrez Gene</b>        | 151887                                                                                                                                                                                          |            |              |
| <b>SwissProt</b>          | Q76M96                                                                                                                                                                                          |            |              |
| <b>Purity</b>             |                                                                                                                                                                                                 |            |              |
| <b>Chemical Structure</b> | IDQGPIRRIE KIRQKGFVQK CKASGVEGQV VAEGNDGGGG AGRPSLGSEK KKEDPRRAQV<br>PPTRESRVKV LRKLAATAPA LPQPPSTPRA TTLPPAPATT VTRSTSRAVT VAARPMTTTA<br>FPTTQRPWTP SPSHRPPTTT EVITARPSV SENLYPPSRK DQHRERPQTT |            |              |
| <b>Quality Control</b>    |                                                                                                                                                                                                 |            |              |
| <b>Directions for Use</b> | Always centrifuge tubes before opening. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.                                                                               |            |              |
| <b>Storage/Stability</b>  | Store it at -20°C to -80°C for one year. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.                                                |            |              |

**Application key:** E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC- Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference

**Species reactivity key:** H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb- Rabbit, S- Sheep, Z- Zebrafish
